4	Delivery, transport, and inspection																															
4.1	<p>Inspection:</p> <p>The overall inspection will be undertaken by a veterinarian/livestock expert of IRW plus a nominated veterinarian from the Provincial Directorate of Animal Health, Kabul Province. IRW livelihood officer together with the technical staff from the Provincial Directorate of Animal Health, Kabul will make supervisory/monitoring visits of the quarantine station. Inspection/monitoring would be undertaken at the following steps:</p> <ul style="list-style-type: none">❖ At collection points: IRW, in the presence of a veterinarian from the local livestock department, will confirm.<ul style="list-style-type: none">- Breed of Ewe, their weight and health;❖ At Quarantine station:<ul style="list-style-type: none">- Each vaccination and deworming will be regularly done by an inspected veterinarian of IRW and nominated veterinarian at quarantine level.❖ At loading from Quarantine to Distribution points At the loading site of IRW and the nominated veterinarian will confirm:<ul style="list-style-type: none">- Animals are healthy and free from any clinical signs.- Confirm the number of Ewe (Female Sheep) per vehicle to be shifted for distribution.- Report the detail of vehicle loaded (i.e number of vehicles, their registration number, model, color) and driver (license number) to IRW loaded for distribution.❖ At offloading/distribution point At unloading, an inspection by IRW should verify the number of Ewes and report on the health condition of the Ewes; IRW will record any injuries and mortalities in transit if any.																															
4.2	<p>Transport vehicle:</p> <ul style="list-style-type: none">- From the quarantine station to the distribution point, the animals to be transported in clean and comfortable vehicles having enough space to prevent crushing and overcrowding and or death. In case of death, the supplier will replace them.-- The vehicle should have a ramp to load and humanely unload the animals.- Ample water and feed should be offered before departure and upon its arrival at the delivery/project site. (Superintendence will report)																															
4.3	<p>Distribution Plan and Delivery:</p> <ul style="list-style-type: none">- Delivery of animal must be carried out as per the distribution plan provided by IRW at the distribution point.- Delivery time shall be during the most convenient hours for animal transportation (late delivery will not be accepted).- Delivery is on a DAP basis (loading, offloading, related labor cost and labor hiring done by the supplier/s) and time delivery is the prime factor in the selection of supplier;- Penalties apply for late delivery.																															
4.4	<p>On arrival: The sheep should arrive at the destination alive, active, and not injured (preferable in the morning or late afternoon). Any diseased, injured animal shall not be accepted and shall be replaced by the supplier per agreed schedule. All animals shall be handed over to the IRW in charge person at the distribution site.</p>																															

Tender Amendment (ToR and Conditions for the Procurement – Sheep), Kabul Province	
4.5	Ownership will be transferred on handover of the sheep to recipients at a specified delivery point. IRW in charge person will get a proper receipt from the beneficiary. All beneficiaries will get training from the IRW staff on the management and rearing of the animals and should have a proper place for keeping the animals.
5	General Conditions
5.1	Upon selection, the supplier will transport the animals to the collection destination (transport is on the risk of the supplier) not to exceed 15 days after receipt of the purchase order and with close coordination with IRW personnel.
5.2	The supplier will be requested to reserve extra numbers of the contracted number of animals to allow replacements for rejections and transport/handling mortality. The Schedule of replacements will be agreed upon by both parties.
5.3	Animals that are not selected may be sold by private treaty and will not become the responsibility of IRW and it could be advised that if signs of disease are detected these animals should be kept under veterinary observation (and diagnostics and medical procedures should be applied) prior to selling, moving etc.
FAILURE TO COMPLY WITH THESE REQUIREMENTS WILL RESULT IN THE BID BEING REJECTED
