II. IMPORTANT INFORMATION REGARDING THIS ITB:

- This ITB is launched for the purpose of establishing a framework agreement with the supplier for the provision of construction rental machinery services for a period of one year, with the possibility of a 12-month extension.
- The ITB (Invitation to Bid) is divided into three (3) lots, each corresponding to a different area office: Central, West, and South. Bidders can submit quotes for one or multiple lots however partial lot submission will not be accepted.
- The estimated annual contractual turnover for provision of construction rental machinery services for all lots is 121,740,800 AFN. DRC is not committed to redeeming the services indicated in the estimation, as contractual consumption may vary due to changes in demand in both directions (increase and/or decrease).
- A framework agreement does not bind DRC to place any Purchase Orders. DRC will place orders with the awarded supplier based on the agreement as per its requirements.
- DRC may choose to cancel the agreement if deemed necessary.
- DRC may choose to split the contract between more than one supplier.
- To participate in the PAs, bidders will need to be successful in this tender exercise. When a PA is established with a supplier, the purchasing mechanism will be based on a Service Contract/PO for a specified period and schedule of services. When DRC requires a service, a Service Contract/PO will be sent to the supplier to contract each specific order and confirm the terms. Each Service Contract/PO will be an individual contract based on the agreed terms in the PA and the governing terms and conditions in the Service Contract/PO and DRC General Conditions of Contract.
- The Service provider will be responsible for providing a driver, fuel, maintenance and replacement of the machinery in case of breakdown during the contract period.
- No advance payment will be made to the awarded supplier. The awarded supplier is expected to mobilize its own resources to deliver the agreed services.
