SELECTION AND AWARD CRITERIA

14. Selection criteria

The following selection criteria will be applied to tenderers. In the case of tenders submitted by a consortium, these selection criteria will be applied to the consortium unless specified otherwise. The selection criteria will not be applied to natural persons and single-member companies when they are sub-contractors:

- 1) Economic and financial capacity of tenderer** (based on item 3 of the tender form). In case of the tenderer being a public body, equivalent information should be provided. The reference period which will be considered will be the last three years for which accounts have been closed.
- 2) Professional capacity of the tenderer** (based on items 4 and 5 of the tender form). The reference period which will be considered will be the last 3 years from the submission deadline.
- 3) Technical capacity of tenderer** (based on items 5 and 6 of the tender form). The reference period which will be considered will be the last 5 years from the submission deadline.

This means that the contract the tenderer refers to could have been started or completed at any time during the indicated period, but it does not necessarily have to be started and completed during that period, nor implemented during the entire period. Tenderers are allowed to refer either to projects completed within the reference period (although started earlier) or to projects not yet completed. In the first case the project will be considered in its whole if proper evidence of performance is provided (statement or certificate from the entity which awarded the contract, final acceptance). In case of projects still ongoing only the portion satisfactorily completed during the reference period will be taken into consideration. This portion will have to be supported by documentary evidence (similarly to projects completed) also detailing its value.

Capacity-providing entities

An economic operator may, where appropriate and for a particular contract, rely on the capacities of other entities, regardless of the legal nature of the links that it has with them. Some examples of when it may not be considered appropriate by the Contracting Authority are when the tenderer relies in majority on the capacities of other entities or when they rely on key criteria. If the tenderer relies on other entities it must prove to the Contracting Authority that it will have at its disposal the resources necessary for the performance of the contract, for example by producing a commitment on the part of those entities to place those resources at its disposal. Such entities, for instance the parent company of the economic operator, must respect the same rules of eligibility as the economic operator. Furthermore, the data for this third entity for the relevant selection criterion should be included in the tender in a separate document. Proof of the capacity will also have to be furnished when requested by the Contracting Authority. With regard to technical and professional

criteria, a tenderer may only rely on the capacities of other entities where the latter will perform the tasks for which these capacities are required. With regard to economic and financial criteria, the entities upon whose capacity the tenderer relies, become jointly and severally liable for the performance of the contract.
